

UX in Science Logo Explorations

Six editable vector directions using the brand guide colors. Each keeps UX explicit and adds simple human/team and science cues.

Jade #4CB944

Sky #00A7E1

Amethyst #34113F

Saffron #E3B505

Mint #F7FFF6

UX

Orbit Lab

Human-centered systems, motion, discovery

A user-centered orbit suggests research systems, people in motion, and iterative inquiry.

BEST FOR

Website mastheads, favicon seed, section dividers

UX

Microscope UX

Observation, researchers, usability sessions

The microscope is paired with participant cues to connect lab observation with human experience.

BEST FOR

Scientific audiences, workshop decks, research reports

UX

Helix Interface

Biology, computation, human factors

The helix becomes a human-centered ladder, linking science, iteration, and people.

BEST FOR

Cross-domain science programs and grant-facing material

UX

Experiment Loop

Testing, synthesis, collaborative lab work

A beaker, feedback loop, and two collaborators connect experimentation with team-based UX work.

BEST FOR

Friendly teaching material, event badges, slide title pages

UX

Data Field

Measurement, participants, evidence

People-as-data points make the mark evidence-led while keeping the human source of insight visible.

BEST FOR

Reports, dashboards, evaluation summaries

UX

Molecular Network

Teams, collaboration, scientific networks

The molecular network is revised as a team network, emphasizing connection and collaboration.

BEST FOR

Community programs, navigation marks, small-size usage

Guidance: keep Dark Amethyst as the main wordmark color; keep human cues simple enough for favicon, slide, and header sizes.
